# Table of Contents

|                                           |   |
|-------------------------------------------|---|
| 1. Purpose and Principles                 | 3 |
| 2. Types of Assessment                    | 3 |
| 3. Grading Scale                          | 4 |
| 4. Assessment Weighting by Subject        | 4 |
| 5. Reporting Schedule                     | 5 |
| 6. Academic Integrity in Assessment       | 5 |
| 7. Accommodations and Modified Assessment | 6 |
| 8. Moderation and Quality Assurance       | 6 |
| 9. Communicating Results to Parents       | 7 |

# 1. Purpose and Principles

Assessment at ABC School is designed to support learning, not only to measure it. This guide sets out the principles, formats, and reporting standards that apply across all subjects and grade levels, ensuring that assessment practices are fair, consistent, and aligned with the Curriculum Guide.

- Assessment should be valid, measuring what it claims to measure.
- Assessment should be reliable, producing consistent results across markers and over time.
- Assessment should inform next steps in teaching and learning, not just produce a score.
- Assessment should be inclusive, providing fair opportunity for all learners to demonstrate understanding.

# 2. Types of Assessment

| Type              | Purpose                                                 | Examples                               |
|-------------------|---------------------------------------------------------|----------------------------------------|
| Diagnostic        | Identify prior knowledge and gaps before instruction    | Pre-unit quizzes, skills checklists    |
| Formative         | Monitor learning during instruction to guide next steps | Exit tickets, classwork, quick quizzes |
| Summative         | Evaluate learning at the end of a unit or term          | Unit tests, projects, term exams       |
| Performance-Based | Assess application of skills in authentic tasks         | Presentations, lab reports, portfolios |

### 3. Grading Scale

Grades 3 and above use a consistent letter-grade scale for summative assessment and term reporting. Pre-K through Grade 2 use a developmental rating scale described separately in the Early Years Assessment Addendum.

| Letter Grade | Percentage Range | Description                                     |
|--------------|------------------|-------------------------------------------------|
| A            | 90-100%          | Exceptional understanding and application       |
| B            | 80-89%           | Strong understanding with minor gaps            |
| C            | 70-79%           | Adequate understanding of core concepts         |
| D            | 60-69%           | Partial understanding; needs additional support |
| F            | Below 60%        | Significant gaps; requires intervention         |

### 4. Assessment Weighting by Subject

| Subject               | Formative (%) | Classwork/Projects (%) | Summative Exam (%) |
|-----------------------|---------------|------------------------|--------------------|
| English Language Arts | 20            | 35                     | 45                 |
| Mathematics           | 20            | 30                     | 50                 |
| Science               | 20            | 35                     | 45                 |
| Social Studies        | 20            | 40                     | 40                 |
| Arts / PE             | 30            | 70                     | 0                  |

## 5. Reporting Schedule

| Report Type           | Timing              | Format                                       |
|-----------------------|---------------------|----------------------------------------------|
| Progress Check-In     | Mid-term, all terms | Brief narrative update via school portal     |
| Term Report Card      | End of each term    | Full report with grades and teacher comments |
| Annual Summary Report | End of Term 3       | Cumulative summary of the academic year      |

## 6. Academic Integrity in Assessment

Honesty in assessment is treated as a foundational expectation rather than a minor classroom rule. Teachers are expected to explicitly teach age-appropriate concepts of academic honesty, including proper citation and the difference between collaboration and copying.

| Grade Band | Example Concern                                                 | Typical Response                                                                       |
|------------|-----------------------------------------------------------------|----------------------------------------------------------------------------------------|
| Grades 1-3 | Copying a classmate's work                                      | Conversation and re-teaching of expectations                                           |
| Grades 4-5 | Plagiarizing part of a written assignment                       | Resubmission required; parent informed                                                 |
| Grades 6-8 | Plagiarism or unauthorized collaboration on a graded assessment | Zero on the affected item; formal record; Vice Principal informed for repeat instances |

## 7. Accommodations and Modified Assessment

Students with a documented Individual Learning Plan (ILP) or a temporary medical need may receive assessment accommodations such as extended time, a separate testing location, or the use of assistive technology. Accommodations are determined in consultation with the Learning Support Coordinator and apply consistently across subjects unless otherwise specified in the ILP.

- Extended time, typically an additional 25-50% of the standard duration.
- Reduced-distraction testing environment.
- Use of approved assistive technology, such as text-to-speech tools.
- Modified question format where the underlying objective can still be validly assessed.

## 8. Moderation and Quality Assurance

To ensure grading consistency across teachers of the same subject and grade, a sample of graded summative assessments is reviewed at a moderation meeting held at the end of each term, facilitated by the Subject Coordinator. Significant discrepancies are discussed and, where appropriate, grading criteria are clarified for future assessments.

## 9. Communicating Results to Parents

Beyond the formal reporting schedule, teachers are encouraged to communicate proactively with parents when a student's performance changes significantly, whether improving or declining, rather than waiting for the next scheduled report.

- Use the school portal for routine updates on classwork and formative assessment results.
- Schedule a direct conversation (call or meeting) for any result that may come as a surprise to the family.
- Frame feedback constructively, pairing areas for growth with specific, actionable next steps.
