Table of Contents

1. Curriculum Philosophy	3
2. Subject Areas Overview	3
3. English Language Arts Curriculum	4
4. Mathematics Curriculum	5
5. Science Curriculum	6
6. Social Studies Curriculum	7
7. Arts and Physical Education	8
8. Foreign Language Program	8
9. Cross-Curricular Skills	9
10. Curriculum Review Cycle	9
11. Resources and Textbook List	10

1. Curriculum Philosophy

The ABC School curriculum is designed around a spiral model, in which core concepts are revisited at increasing levels of complexity across grade levels. This approach builds depth over time while reinforcing foundational skills. Subject Coordinators work together to ensure horizontal alignment within a grade and vertical progression across grades.

This guide describes general learning outcomes by subject and grade band. Detailed unit plans are maintained separately by each Subject Coordinator and updated annually.

2. Subject Areas Overview

Subject	Weekly Periods (Primary)	Weekly Periods (Middle School)
English Language Arts	8	6
Mathematics	6	6
Science	4	5
Social Studies	3	4
Foreign Language	3	4
Arts (Visual/Music)	2	2
Physical Education	3	3

3. English Language Arts Curriculum

The English Language Arts program develops reading, writing, speaking, and listening skills through an integrated approach combining structured phonics instruction in early grades with rich exposure to literature across all grades.

Grade Band	Reading Focus	Writing Focus
K - Grade 1	Phonemic awareness, sight words, guided reading	Letter formation, simple sentences
Grades 2-3	Fluency, comprehension strategies	Narrative and informational paragraphs
Grades 4-5	Inference, theme analysis, varied genres	Structured essays, narrative writing
Grades 6-8	Literary analysis, research skills	Argumentative and analytical essays, research reports

4. Mathematics Curriculum

The Mathematics program builds number sense, problem-solving strategies, and mathematical reasoning in a sequential progression, with regular spaced review of previously mastered skills.

Grade Band	Key Topics
K - Grade 1	Counting, number recognition, basic addition/subtraction, shapes
Grades 2-3	Place value, multi-digit operations, fractions introduction, measurement
Grades 4-5	Multi-digit multiplication/division, fraction operations, decimals, basic geometry
Grades 6-8	Ratios and proportions, integers, introductory algebra, geometry, statistics

Mathematics instruction includes a weekly problem-solving session focused on applying concepts to open-ended, real-world style problems rather than routine computation alone.

5. Science Curriculum

The Science program follows an inquiry-based model in which students regularly engage in hands-on investigation rather than relying solely on textbook learning. Units are organized around the three major domains of life science, physical science, and earth/space science.

Grade Band	Sample Units
K - Grade 1	Living vs. non-living things, weather and seasons, the five senses
Grades 2-3	Plant and animal life cycles, states of matter, simple machines
Grades 4-5	Ecosystems, forces and motion, the water cycle, the solar system
Grades 6-8	Cells and genetics, chemical reactions, energy transfer, earth systems

Each Science unit from Grade 3 onward includes at least one formal lab investigation with a written report, scaffolded according to grade level expectations.

6. Social Studies Curriculum

Social Studies integrates history, geography, civics, and basic economics, with an emphasis on developing informed, engaged citizens who can think critically about the world around them.

Grade Band	Sample Units
K - Grade 1	Myself and my family, my community, maps and globes
Grades 2-3	Local history, world cultures, basic geography skills
Grades 4-5	National history overview, regional geography, government basics
Grades 6-8	World history overview, economics fundamentals, civics and current events

7. Arts and Physical Education

Visual Arts and Music are taught on a rotating basis throughout the year, giving students exposure to both disciplines. Physical Education emphasizes fundamental movement skills in early grades, progressing to game-based skill development and fitness concepts in upper grades.

Subject	Focus by Grade Band
Visual Arts	K-3: exploration of materials and basic techniques; 4-8: composition, art history, personal expression
Music	K-3: rhythm, singing, basic instruments; 4-8: notation, ensemble performance, music appreciation
Physical Education	K-3: fundamental movement skills; 4-8: team sports, fitness concepts, sportsmanship

8. Foreign Language Program

ABC School offers a foreign language program beginning in Kindergarten, building conversational competence in the early years and progressing toward reading and writing fluency by Grade 8. Currently offered languages are determined annually based on staffing and family interest, and are communicated at the start of each academic year.

9. Cross-Curricular Skills

In addition to subject-specific outcomes, the curriculum is designed to build a set of transferable skills across all subjects:

- Critical thinking and problem-solving
- Collaboration and communication
- Digital literacy and responsible technology use
- Research skills and information evaluation
- Self-management and reflective learning habits

10. Curriculum Review Cycle

Review Activity	Frequency	Owner
Unit-Level Review	End of each unit	Class/Subject Teacher
Subject Curriculum Audit	Annual	Subject Coordinator
Full Curriculum Review	Every 3 years	Vice Principal (Academics) and Subject Coordinators

11. Resources and Textbook List

Core textbooks and resource materials are selected by Subject Coordinators and reviewed during the annual subject audit described above. A representative (non-exhaustive) sample of resource categories used across the curriculum is listed below; actual titles vary by year and are confirmed in the Term 1 supply list sent to families.

Subject	Resource Type
English Language Arts	Core reader series, leveled classroom library, writing workbooks
Mathematics	Core textbook series, manipulatives kits, online practice platform
Science	Core textbook series, laboratory kits, digital simulation tools
Social Studies	Core textbook series, atlas sets, primary source document packs
